Knowledge is Power.

Condition monitoring for profitable maintenance

More than 40 years of experience and close cooperation with our users worldwide enable SPM to present a revolutionary innovation for pro-active maintenance.

Your requirements

set the limits

Try new working conditions. Leonova™ Infinity is light-weight, ergonomic and easy to operate. Under menu guidance, you select Leonova functions via the key pad or the touch screen. The fast processor and very large memory make data logging more efficient than ever. Load Leonova from the PC, then simply measure and save. All input data is pre-programmed. You get an instant condition evaluation on a green – yellow – red scale.

Leonova™ infinity

- Ergonomic
- Light weight
- Intelligible
- Multifunctional
- Cost-effective
- Modular

Condition monitoring costs money for equipment, training and labour. With Leonova, you have a free choice of suitable instrument functions and how to pay for their use.
